## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- The compounds according to claim 2 of formula I, wherein Q and Q' are
   N. These are classifiable in class 544, subclass 14+.
- II. The compounds according to claim 1 of formula I, wherein Q and Q' areC. These are classifiable in class 548, subclass 181.
- III. The process according to claim 18 of formula I, wherein Q and Q' are N.
  These are classifiable in class 544, subclass 14.
- IV. The process according to claim 18 of formula I, wherein Q and Q' are C.These are classifiable in class 548, subclass 181.

Inventions of Group I and II and Group III and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different products, such as those described in J. Am. Chem. Soc. 1994, 116, 4336-40 and WO97/32571.

The inventions of Groups I-IV are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating one member will not render another obvious.

Art Unit: 1623

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the four groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

A telephone call was made to Bradford Addison on November 15, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant election of specifically disclosed species according to claim 30 to be examined for search purposes is acknowledged in the response filed September 8, 2005.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL V WARD whose telephone number is 571-272-2909. The examiner can normally be reached on M-F 8 am to 4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0642. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
